

**CLAIMS**

I claim:

5        1. A head covering comprising:  
            a cap including a head cover member and a bill;  
            a shroud assembly including a shroud being removably  
depending from said cap;  
            fastening members for fastening said shroud to said cap; and  
10        a mirror assembly including a mirror being hingedly attached  
to said bill for allowing a user to view about oneself while wearing  
said head covering.

15        2. The head covering as described in claim 1, wherein said  
bill is securely attached to said head cover member, and extends  
forwardly therefrom, and has a top side, and further has a recessed  
portion disposed in said top side.

20        3. The head covering as described in claim 2, wherein said  
recessed portion includes a mirror-receiving recessed portion  
extending through a portion of a front edge of said bill and being  
spaced from side edges of said bill and extending along and being  
spaced from a portion of a back edge of said bill, and also includes  
handle-receiving recessed portions being disposed through said side  
25        edges of said bill and being continuous offshoots of said mirror-  
receiving recessed portion.

30        4. The head covering as described in claim 3, wherein said  
cap further includes a first elastic tab being attached to a back side  
and to a bottom edge of said head cover member for adjusting the  
size of said head cover member.

5. The head covering as described in claim 4, wherein said mirror has a back edge which is hingedly attached to said front edge of said bill and also has a front edge, said mirror being removably  
5 received in said mirror-receiving recessed portion.

6. The head covering as described in claim 5, wherein said mirror assembly further includes an elongate handle member being attached to said front edge of said mirror, said handle member  
10 having a main portion being removably received in said mirror-receiving recessed portion and also having end portions being removably received in said handle-receiving recessed portions.

7. The head covering as described in claim 6, wherein said shroud assembly also includes a support strip being attached along a top edge of said shroud, and further includes a second elastic tab being attached to said support strip for adjusting the size of said support strip, and also includes a stiffener strip being disposed in an intermediate portion of said shroud and extending from said top  
20 edge to a bottom edge of said shroud for preventing said shroud from being blown about in the wind.

8. The head covering as described in claim 7, wherein said support strip includes a head cover attaching portion, and also  
25 includes bill attaching end portions, said head cover attaching portion and said bill attaching end portions being planar portions, said planar portion of said head cover attaching portion being disposed generally 90 degrees relative to said planar portions of said bill attaching end portions to facilitate attaching said support  
30 strip to said head cover member and to said bill.

9. The head covering as described in claim 8, wherein said fastening members include first fastening members being attached along said bottom edge of said head cover member and along said 5 side edges of a bottom side of said bill, and also include second fastening members being attached along said support strip and being fastenable to said first fastening members.

10. The head covering as described in claim 9, wherein said 10 shroud is a sheet of material being removably depending from said bottom edge of said head cover member and from said side edges of said bill.

11. The head covering as described in claim 10, wherein said 15 shroud is a sheet of mesh material being removably depending from said bottom edge of said head cover member and from said side edges of said bill.
